Individual Configurations

If you require even more comfort, flexibility and extra safety you can change or add components to your breathing apparatus.

To meet your demand and budget, you can customise your own individual SCBA using the 3D Configurator, available on CD or online:

www.msa-scba.com.

AirGo compact

Breathing Apparatus for Emergency Response and Escape

The AirGo compact self-contained breathing apparatus is specifically designed for emergency response and escape. On ships or industrial facilities where such units are mandatory, the AirGo compact is the optimal choice.

With its excellent value for money, AirGo compact offers reliable breathing protection even within

toughest applications including firefighting. The vital pneumatic and carrier components are the same as those used in the high-end MSA SCBA models.

The demand valve is directly attached to the pressure reducer, allowing quick donning even by relatively inexperienced personnel.

Features & Benefits

- No frills-system → Low investment costs
- High quality materials → Maximum safety and durability
- Fixed demand valve → Faster donning
- Close-fitting hoses → Easy to don and safe to use
- State-of-the-art pressure reducer → Requires only minimal maintenance
- Integrated warning signal → Provides higher levels of safety
- Integrated transponder → For easy inventory management
- EN 137:2006 (2) approved → For all applications, incl. firefighting

Accessories

The optimal supplement to the AirGo compact is the economical 3S full face mask. The 3S features comfortable materials as well as anti fogging air flow, and allows clear communication through its speech diaphragm. Alternatively you can choose the premium Ultra Elite mask. For details please ask for the separate leaflets on our range of masks.

The optional wall box holds an AirGo compact with one cylinder and mask. The quick-release wall box cover and SCBA cylinder suspension system allow immediate use without losing precious seconds.

MSA offers a variety of cylinders and helmets for all industrial and fire service applications which fit perfectly together with the SCBA.
