

SKA-PAK AT

AUTOMATIC-TRANSFER SUPPLIED AIR RESPIRATOR

AUTOMATIC TRANSFER, INSTANT PEACE OF MIND

The Ska-Pak AT is the most advanced supplied air respirator from Scott Safety, equipped with the added benefit of a patented, automatic, hands-free air transfer capability. If the primary air supply to the respirator is interrupted, the air source is instantly switched to the portable air cylinder without user intervention. Upon transfer, the Vibralert tactile alarm system activates, vibrating the user's facepiece and alerting the user that the respirator has transferred to cylinder air. The Ska-Pak AT is ideal for many applications, including confined space operations, hazardous materials clean-up and maintenance jobs for numerous markets, including chemical, petrochemical, oil & gas, ship building and public utilities.

PRODUCT HIGHLIGHTS

- Automatic, hands-free transfer from external air source to cylinder in the event of primary air source interruption
- Personal, tactile Vibralert alarm to alert users of transfer to cylinder air
- "Onboard" cylinder low pressure indicator for ultimate safety and awareness
- E-Z Klip cylinder retention system for quick and easy cylinder changes
- Three harness styles:
 - o A padded Polypropylene harness - chemically-resistant and lightweight
 - o A padded Kevlar harness - ideal in high heat environments or when there is potential for sparking
 - o An integrated full-body harness - ideal for confined space applications

SKA-PAK AT WITH FULL-BODY HARNESS

PART NUMBER:

Select a one- or two-digit number per box from the chart above that corresponds to your choice

SAR	4	2			0					1
-----	---	---	--	--	---	--	--	--	--	---

- ① If you prefer an alternate facepiece style, head harness or size, choose "none" and order an approved facepiece as a separate line item.
 ② Cases are not compatible with select FBH styles. If selecting a FBH, please choose "none" for the case option.

HANDS FREE = PANIC FREE

The Ska-Pak AT is a Type C combination supplied air respirator with the added benefit of automatic, hands-free transfer capability. If your primary air source is interrupted, you are automatically transferred to your egress air cylinder.

REGULATOR

The E-Z Flo pressure demand regulator with Vibralert tactile alarm notifies the wearer of transfer to cylinder air by vibrating the facepiece.

EOSTI

A flashing, electronic gauge and indicator notifies the user of cylinder status and alerts the user when cylinder pressure is low.

HARNESSES

The nylon and Kevlar harnesses are lightweight with padded adjustable shoulder straps for maximum comfort. An integrated full-body harness is also available, ideal for confined space applications.

AIRLINE FITTINGS

Available with Hansen, Schrader, Cejn, Hansen HK plug or Hansen HK socket fittings.

CYLINDER OPTIONS

The Ska-Pak AT Supplied Air Respirator is available with numerous rated cylinders, featuring the E-Z Klip cylinder retention system:

- 3-minute 2216 psi aluminum
- 5-minute 3000 psi carbon
- 10-minute 3000 psi carbon
- 10-minute 4500 psi hoop-wrapped
- 15-minute 3000 psi hoop-wrapped
- 15-minute 4500 psi carbon

FACEPIECES

The Ska-Pak AT Supplied Air Respirator can be used with the AV-2000, AV-3000 or AV-3000 with SureSeal facepieces, which feature the Scott Safety Top-Down Convertibility platform, allowing one facepiece to be used in numerous respiratory protection applications, from supplied air to air purified. This one-facepiece concept reduces inventory and training costs and eliminates the need to fit-test multiple facepieces for each employee.
